

Index

- Adjusted Goodness of Fit Index (AGFI), 129, 168
- Adoption intention, 157
- Age
- impact of age on usage of e-payment following five null hypotheses, 92
 - analyze influence of demographic characteristics on e-payment based on, 89–97
 - effect on SEPS model, 174–177
- Agenda 2030, 9
- Analysis of variance (ANOVA), 41
- Analytical Hierarchy Process (AHP), 191
- method, 41–42
- Attitude (ATT), 30
- Automated-teller-machine (ATM), 5
- Autonomy to Use Technology (AUTT), 134, 157, 174, 178–179, 186, 190
- validation of AUTT through CFA, 134–135
- Average Variance Extracted (AVE), 144
- Bartlett Test of Sphericity, 126
- Bartlett's measure tests, 125–126
- Behavioural intention (BI), 39
- Bharat Interface for Money (BHIM), 35–36
- Bibliometric analysis (*see also* Confirmatory factor analysis (CFA)), 23–25, 28
- influential authors, 26–27
 - influential countries, 27
 - influential keywords, 27–28
 - influential sources, 28
 - phase, 25
 - results of, 26–28
- Brundtland report (*see* United Nations World Commission on Environment and Development (1987))
- Capital market, 1–2
- Cash on delivery (COD), 39
- Chi-square test, 115
- Chi-square value normalized by degrees of freedom (CMIN/df), 144
- Clear theory conceptualization, 70
- Co-authorship visualization, 26–27
- Comma-separated values (CSV), 25
- Communication, 140
- benefits offered by e-payment, 84–85
- Comparative Fit Index (CFI), 129, 168
- Competition, Confidence, Cost, and Convenience (4C), 6
- Confirmatory analysis, 69–70
- Confirmatory factor analysis (CFA) (*see also* Bibliometric analysis), 14, 32, 70, 116, 144, 155–156, 162, 186
- validation of AUTT through, 134–135
 - validation of e-payment system factors through, 129–143
 - validation of FSI through, 137–138
 - validation of PIS through, 143
 - validation of TC through, 138–140
 - validation of TCP through, 141
- Consumer demographics, 58–61
- Coverage, Confidence, Cost, Convenience and Convergence (5C), 6

- Cronbach's reliability statistics of all statements, 122–125
- Cronbach's α , 118
- Data extraction, 25
- Data reduction technique, 126
- Databases, 191
 - selection, 25
- Demographic dossier of respondents, 74–77
- Demographics, 161–162
- Demonetization?, 32–33
- Department of Investment and Public Asset Management (Dipam), 3–4
- Descriptive analysis of online payment, 78–89
- Descriptive approach, 68
 - in e-payment system, 68
- Descriptive statistics, 115
- Diagnostic approach in e-payment system, 68
- Digital banking and payment (DBP), 38
- Digital India, 6
 - project, 3–4
- Digital payment (DP), 24–25, 53
- Digital payment systems (DPSs), 32–33
- Digital transactions, 5
- Digital wallets (DWs), 36
- Digitalization, 73
- Diversity in customers, 74
- E-payment (EP), 5–6, 9–10, 29, 78–79, 186
 - impact of age on usage of e-payment following five null hypotheses, 92
 - barriers faced using, 83
 - barriers in acceptance of, 84
 - based on gender, age, education and income, analyze influence of demographic characteristics on, 89–97
 - communication benefits offered by, 84–85
 - impact of education on usage of e-payment following five null hypotheses, 92–97
 - features make e-payment as financial innovation, 87–88
 - feedback of respondents on, 79–80
 - gateway, 6
 - impact of gender on usage of EP following five null hypotheses, 91–92
 - impact of income on usage of e-payment following five null hypotheses, 97
 - innovative features of financial service of e-payment, 87
 - innovative features of financial technology of e-payment, 85
 - preference for e-payment over other modes of payment, 80–83
 - preference for payment mode, 79
 - quality of, 89
 - reasons for use of, 80
 - reasons resist use of, 89
- E-payment system (EPS), 2–4, 23–24, 53, 73, 113, 115, 155–157, 186
- AUTT, 132–135
- Cronbach's reliability statistics of all statements, 122–125
- and data security, 52
- descriptive and diagnostic approach in, 68
- and e-commerce, 44–51
- Eigen value, 126
- and financial services, 44–51
- and financial technology, 51
- FSI, 136–138
- identification of factor structure of E-payment system through EFA, 118–129
- and network security, 52
- perception of users towards, 102
- PIE, 131–132
- PIS, 142–143
