

SUBJECT INDEX

80/20-rule 188, 199, 200
- generalized 188

A

adjusted counting 255
aging distribution
- cumulative 323
- exponential 304, 316
- lognormal 304
alphabetical ranking 310
arc 297
ASCII coding 67
Asian languages 328
author count
- pure geometric 255
- senior 254
- total 254
author rank 304
- distribution 308
authors
- number per paper 90
authorship determination 328
average 110
average effort 70
average information content 69
average screen length 359

B

Benford's law 20
Bernoulli trial 309
bibliometrics 7
binary digit 67
binomial distribution 272, 309
bit 67
book 8
Booth's law 47
borrowing 202
box-counting dimension 239
Bradford formalism 105
Bradford multiplier 22, 23, 126
Bradford's function (see also Bradford's law) 122, 129, 143
Bradford's law 22, 126, 154
- graphical formulation 24, 105, 127, 154, 156
- group-free version 23
- verbal formulation 24
branch 55

Brookes' law 153
Buckland's problem 40

C

cardinality 11
career duration 93
Cartesian product of IPPs 326
Central Limit Theorem 302
Chinese symbols 334
Chinese words 87
citation 8
citation age 300
citation network 87
classification of subjects 328
CLT 302
coastline of Norway 241
coefficient of variation: see variation coefficient
collaboration network 87
complexity 231
compression of texts 328
concave 193, 197, 315, 319, 320
concentration measure 189, 190, 194, 198, 205
concentration theory 187
- continuous 196
- discrete 192
- Lotkaian 187, 199
- of linear three-dimensional informetrics 218
- of Type/Token-Taken informetrics 226
conditional expectation 56, 270
conferences 7
continuous concentration theory 196
continuous Lotka function: see Lotka's law
convolution 251, 277, 280, 281, 284
counting
- adjusted 255
- fractional 247, 258
- normal 254
- proportional 258
- standard 254
- straight 254
- total 18, 247, 257
counting procedure 253
crediting system 253
cumulative advantage 45

cumulative aging distribution 323
 cumulative citation distribution 325
 cumulative first-citation distribution 314
 cumulative n^{th} citation distribution 323, 325
 cumulative rank-frequency function 13, 105

D

De Solla Price's law: see Price's law
 decimal digit 68
 decreasing exponential function 15
 decreasing power law 14
 demography 9
 density 26
 diachronous 325
 - obsolescence 40
 dictionary 67
 dimensional complexity 239
 discrete concentration theory 192
 discrete Lotka function: see Lotka's law
 dit 68
 diversity 214
 domain name 90
 double logarithmic scale 98
 dual function 252
 dual IPP 13, 102
 dual Lotka law 276
 dual size-frequency function 144, 276
 dual, duality 12, 102, 159, 325

E

econometrics 9, 21
 entropy 65, 69, 213
 Erdős-Rényi model 33
 Erdős-Rényi network 88
 error correction 328
 error detection 328
 evolution in time 28, 31, 32
 existence theorem 111, 116
 exponential aging distribution 304, 316
 exponential function 32
 exponential growth 34
 exponential obsolescence 34
 exponentially decreasing rank-frequency function 135

F

Failure Breeds Failure 48
 FBF 48
 first-citation distribution 313
 - cumulative 314

forgetting 33
 fractal 232
 - self-similar 232, 234, 243
 fractal dimension 232, 236, 243
 fraction of multinational publications 274
 fractional 92
 fractional author count 255
 fractional count(ing) 18, 247, 258
 fractional counting system 146
 fractional frequency curve 372
 fractional frequency distribution 288, 292, 295
 fractional frequency score 146
 fractional score 146
 fractional scoring system 251
 fractional size-frequency function 276
 fractionated score 275
 fractionated scoring system 256
 Fubini's theorem 308
 functional relation 370

G

gambling theory 56
 Gaussian distribution 302
 generalized 80/20-rule 188
 generalized bibliography 8, 101
 geometric mean 269
 Gini index 194, 198, 205
 Goodness-of-fit 395
 Gozinto theorem 175
 graph 87
 Groos droop 139, 298
 growth 55
 growth process 61
 growth rate 34

H

Harmonic Mean Response Times 314
 Hausdorff-Besicovitch dimension 236
 hyperlink 87

I

identification of languages 328
 immediacy index 314
 incomplete data 373
 indexation of music 328
 indexing 327
 inequality 187
 inflection point 140
 information content 66
 information production process 8, 101
 information retrieval 326

Information Science Abstracts 86
 informetrics 7, 86

M

Mandelbrot's argument 329
 Mandelbrot's function: see Mandelbrot's
 law
 Mandelbrot's law 19, 42, 122, 128, 143,
 245
 martingale 60
 Maximum Entropy Principle 76
 Maximum Likelihood Estimating 390
 mean citation age 301
 mean reference age 304
 measure of dispersion 214
 measure of the concentration: see
 concentration measure
 median citation age 300
 median reference age 304
 memories 33

MEP 76
MLE 390
most-recent-reference distribution 325
multi-authored paper 304
multiple authorship 247
multiple sources 247
multiplier of Lagrange 71, 77

N

Naranan model 34
Neperian logarithm 68
network 87
- citation network 87
- collaboration network 87
N-gram 326
- non-redundant 327
- redundant 327
noblesse oblige 256
node 55
nonlinear regression 320
non-redundant N-gram 327
normal counting 254
N-word phrase 326

O

Obsolescence 40
- diachronous 40
- synchronous 40
O-notation 306
out-link 89

P

parallelepiped 233
Pareto's law 21
PLE 70
PME 78
positive reinforcement 163, 175, 223
- concentration 219
post-coordinative retrieval 326
power law: see Lotka's law, Zipf's law
Pratt's measure 196, 207
pre-coordinative indexing 326
Price index 304
Price's law, Price's law of concentration
94, 97, 188, 214, 394
Price's square root law: see Price's law
Principle of Least Effort 70
Principle of Most Effort 78
principle of nominal increase 190, 223
product property 29, 30, 251
proportional author count 255
proportional counting 258

publication game 46

Q

quantitative linguistics 8

R

random network 33, 88
random text 42, 245
rank-frequency function 12, 105, 333
ranking 11
ratio scale 28, 99
rectangle 233
redundant N-gram 327
reference 8
reference age
- mean 304
- median 304
regression
- linear 241, 388
- nonlinear 320
retrieval of music 328
Riemann-zeta function 17, 381, 391

S

sample 373
SBS 45
scale-free (property) 27, 85, 86, 98, 246
- characterization of power laws 29
scale-free function 365
scale-invariant property 189
scattering 40
scientometrics 7
search key 328
seed 308, 310
self-similar, self-similarity 233, 246
self-similar fractal 232, 234, 243
sensation 68, 94
sensation law of Weber-Fechner: see
Weber-Fechner's law
significant-digit 20
similarity dimension 234, 236
similarity measure 327
situation 90
size-frequency function 10, 105, 333
slope of the regression line 262
social network 88
source 8
source systematic sample 374
source-item identity 298
speech recognition 328
S-shaped (growth) 33, 315, 319, 320
standard counting 254

standard normal distribution 302
standards, standardization 10, 89
stimulus 68, 94, 98, 218
stochastic process 55
straight counting 254
stretched exponential 33
submartingale 60
success 309
Success Breeds Success 45
super source 253, 256
supermartingale 60
synchronous 325
- obsolescence 40
systematic sample in the items 374
systematic sample in the sources 374

T

Theil's measure 195, 211
theorem of total probability 281, 305, 308, 310
three-dimensional informetrics 157
- linear three-dimensional informetrics 161
- linear three-dimensional Lotkaian informetrics 175
time dependence 92
total count(ing) 18, 247, 257
total influence 172
total scoring system 249
transfer principle 190
tree 55
triadic von Koch curve 234, 242
truncation 327
- generalization 327-328
TT (informetrics): see Type/Token
TTT (informetrics): see Type/Token-Taken
two-dimensional informetrics 9, 157
Type/Token 8, 168
- average 352
Type/Token-Taken 168, 226, 329
- average 352
- concentration 226
- Lotkaian Type/Token-Taken informetrics 177
Type-Token identity 298

U

universal Bradford multiplier: see Bradford multiplier
urn model 46

V

variation coefficient 195, 207

W

Weber-Fechner's law 68, 75, 94, 218
WWW 87

Z

Zipf's function: see Zipf's law
Zipf's law 19, 150, 328, 393
